PROFESSIONAL SUMMARY

For 23 years I've served high-end companies like Google, OpenAI (ChatGPT), XP Investimentos, Red Bull, and IVECO. I'm a multidisciplinary professional with a background in education from PUC Campinas and ESAMC universities.

I began my career at the largest advertising agency in the interior of São Paulo at the time, Portal Publicidade. There I became absolutely certain about the type of work environment I wanted. Later, I went to other agencies and ended up receiving many referrals as a freelancer.

As a result, for 13 years I led my own agency (BALBOAiD), which served large business groups such as Shell, Ambev, and Bad Boy™ USA. In 2021, I received an invitation to join the team at CM Capital, the largest independent operator in the Brazilian and Spanish financial markets, which led me back to Corporate Business (as an employee, instead of an employer), moving from Campinas to São Paulo city and closing BALBOAiD, understanding that it would be a new path.

Unexpectedly, I received an invitation to work with a Big Tech company: Google. In a 7-month project, in partnership with Creators.LLC (a successful Google for Startups startup), I was invited to be a Web Development Instructor and was able to teach 100 students how to create their own websites. Google funded the entire project for the 100 students, as well as the professionals involved. It was the first time I generated an invoice for Silicon Valley. It was also the first time I attended Google events and had direct contact with highly qualified professionals from this FAANG. This experience changed my whole life, and I am extremely grateful for it!

Later, I received an invitation from the consulting firm Michael Page® and joined the Marketing team at the largest Travel Tech company in Latin America - Omnibees, where I was able to work with the company's Product Design team in Portugal. Subsequently, I was invited by Geekle (England) to be a judge at a global-level Hackathon. During the same period, I started working with Casa do Ingresso (official partner of Allianz Parque) to develop a mobile app; Positive result, which led to an original SaaS. I developed Android and iOS apps.

Later, I was hired by the English (and global) company UENI Limited. Today I work for the American company based in Boston: FloCareer as a Tech Recruiter (Senior Tech Interviewer).

Today, I lead BALBOAiD as Tech Lead & Senior AI Engineer, combining software engineering, AI training and evaluation, LLM assessment, evaluation rubric design, and generative AI workflows with over 23 years of multidisciplinary experience. Alongside technically complex digital projects, I develop evaluation criteria, scoring frameworks, and quality assurance processes that help assess AI-generated outputs against objective technical and functional requirements.

My work brings together AI, software architecture, interactive 3D, UI/UX, and digital product development, connecting engineering precision with creative thinking and business impact. Through international projects and professional engagements, including work with Revelo USA, I continue to expand my expertise at the intersection of AI and technology.

At 38, I still carry the spirit of the 14-year-old boy who sat in front of his IBM Aptiva, dreaming of making a living doing what he loved. More than two decades later, that dream continues to evolve. I'm still building, learning, solving problems, and exploring what's possible when technology meets creativity. And I'm just getting started.

EDUCATION

- PUC Campinas – Advertising & Marketing, 2009-2012
- ESAMC Campinas – Advertising & Marketing, 2007-2008
- Fundação Bradesco Campinas – Primary and Secondary Education, 1996-2006

LICENSES & CERTIFICATIONS

- **Google Cloud – Builder Connect**
  Artificial Intelligence & Cloud Computing | September 2026

- **Geekle Worldwide Artificial Intelligence Hackathon 1.0 – Senior Front-End Judge**
  Geekle.us | June 2024
- **Google for Startups – Creators Talks - Certificate of Participation**
  Creators Platform LLC | August 2024

- **Expo Empreendedor 2024 – Certificate of Participation**
  Expo Empreendedor | July 2024

LANGUAGES

- English – Fluent (C2) – Wings Language Courses, 2000-2025
- Portuguese – Native

PROFESSIONAL SKILLSET

Core Expertise

AI Engineering, Generative AI, LLM Evaluation, AI Training and Evaluation, AI Quality Assessment, Evaluation Rubric Design, Scoring Frameworks, Structured Feedback, Prompt Engineering, Human-in-the-Loop Evaluation, Technical Leadership, Software Architecture, Full-Stack Development, Product Engineering.

Artificial Intelligence Evaluation & Model Quality

AI Output Assessment, Evaluation Criteria, Rubric Development, Instruction Following, Error Analysis, Quality Assurance, Functional Validation, Benchmark-Oriented Testing, Acceptance Criteria, Technical Compliance, AI-Assisted Workflows, 3D Asset Evaluation, Model Output Validation.

Software Engineering

JavaScript, TypeScript, React, Angular, Node.js, React Native, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, REST APIs, GraphQL, Firebase, SQL, NoSQL, Git, GitHub, CI/CD, Responsive Development, Component-Based Architecture, API Integration, Performance Optimization, Application Security.

Technical Leadership & Delivery

Tech Lead, Engineering Strategy, System Design, Solution Architecture, Code Review, Technical Assessment, Agile, Scrum, Kanban, Jira, Trello, Requirements Analysis, Risk Assessment, Technical Documentation, Cross-Functional Collaboration, Stakeholder Management, Team Leadership, Project Delivery.

Technical Interviewing & Talent Assessment

Senior Technical Interviewer, Technical Recruiting, Software Engineering Assessment, Coding Interviews, Problem-Solving Evaluation, System Design Interviews, Candidate Assessment, Interview Frameworks, Evaluation Methodologies, Technical Reporting, Interview Script Development, Developer Mentoring.

UI/UX & Digital Product Design

UI/UX Design, Product Design, Interaction Design, Design Systems, Wireframing, Prototyping, Usability, Accessibility, Figma, Sketch, Adobe XD, Web Design, Mobile App Development, Digital Product Strategy, User Testing, Branding, Art Direction.

3D & Creative Technology

Blender, Three.js, Maya, Cinema 4D, GLB/GLTF, Interactive 3D, 3D Asset Development, Procedural Geometry, PBR Materials, Asset Optimization, Visual Computing, Motion Design, Adobe After Effects, Adobe Photoshop, Adobe Illustrator.

Business Intelligence & Data Analytics

Microsoft Power BI, Business Intelligence (BI), Data Visualization, Dashboard Development, KPI Monitoring, Data Analysis, Reporting, Data-Driven Decision-Making, Microsoft Excel, Spreadsheet Modeling, Data Reporting.

Productivity Tools

Microsoft Office, Microsoft Word, Microsoft PowerPoint, Microsoft Excel, Microsoft Outlook, Microsoft Teams, Microsoft 365, Document Creation, Presentation Design, Spreadsheet Management, Business Documentation.

Cloud, CMS & Low-Code

AWS, Microsoft Azure, WordPress, Bubble, OutSystems, Vercel, Firebase, Cloud Deployment, Content Management Systems, Web Application Development.

Business & Communication

Technical Consulting, Digital Transformation, Product Strategy, Client Management, Business Requirements, International Collaboration, Technical Training, Web Development Instruction, English C2, Portuguese Native.

PROFESSIONAL EXPERIENCE

05/2026 – Present

BALBOAiD

Campinas/SP - Brazil | Self-Employed | Remote

Tech Lead & Senior AI Engineer

- Lead AI-driven engineering initiatives combining AI training and evaluation, generative AI, software development, and scalable architecture.
- Design evaluation rubrics, scoring frameworks, task guidelines, and acceptance criteria, translating complex requirements into measurable quality standards.
- Support AI model training and improvement through rubric-based evaluation, structured feedback, and systematic output assessment.
- Evaluate AI-generated outputs for factual accuracy, logical consistency, technical correctness, visual quality, and instruction adherence.
- Validate AI training and evaluation materials against task specifications, expected outputs, scoring criteria, and acceptance standards.
- Apply benchmark-oriented testing and deterministic checks to assess output quality, consistency, compliance, and functional correctness.
- Develop AI-assisted workflows for technical content, interactive visualizations, and digital assets, combining generative tools with human review and quality assurance.
- Engineer and validate 3D assets and interactive experiences using Blender, JavaScript, Three.js, and GLB/GLTF pipelines.
- Build scalable web applications with React, TypeScript, JavaScript, and REST/GraphQL APIs, prioritizing performance, security, accessibility, and maintainability.
- Define engineering standards, architecture guidelines, code reviews, version control, documentation, and quality assurance practices.
- Bridge AI evaluation, software engineering, visual computing, and product development to deliver reproducible workflows and technically verifiable results.
- Leverage 20+ years of experience in software engineering, UI/UX, digital products, creative technology, and technical leadership.

Impact & Selected Achievements

- Standardized AI output evaluation across more than 200 tasks by developing rubrics, scoring frameworks, and acceptance criteria.
- Identified recurring model issues in approximately 500 evaluations, providing structured feedback on factual accuracy, instruction adherence, and technical correctness.
- Built ~100 AI-assisted workflows for technical content, interactive visualizations, or digital assets, drastically reducing deliver time and deploy.
- Developed and validated ~50 3D assets or interactive experiences using Three.js and GLB/GLTF pipelines.

10/2025 – 08/2026

FloCareer

Boston, Massachusetts - United States | Full Time | Remote

Tech Recruiter (Senior Tech Interviewer)

- Conduct international technical interviews (United States, India, and England) of highly qualified professionals (Tier-S), structured for various roles in the technology field, including Full Stack, Front-End, Data Engineering, and QA Engineering;
- Companies served: Turing (USA), Mphasis (UK/USA), Impetus (USA), IRIS Consulting (USA), M3BI - a Zensar Company (India), and Keyrus (USA);
- Clients covered: Delta Airlines, USA Navy, USA Navy Seals and others;
- Evaluate candidates on their code building, System Design, Software Engineering and Infrastructure, best practices, and problem-solving skills;
- Conduct interviews with Full Stack Developers (Microservices, AWS, Spring Boot, SQL, Redux, APIs, and CI/CD);
- Conduct interviews with Front End Developers (React, Angular, Vue JS, TypeScript) focusing on UI/UX, accessibility, and componentization;
- Conduct interviews with Data Engineers (Python, SQL, Power BI, DAX, Microsoft Fabric, Azure Data Factory, ADLS Gen2, Apache Iceberg, DBT with Snowflake, Oracle GoldenGate);
- Conduct interviews with QA Engineers in areas such as manual testing, automation with Playwright, Postman, continuous integration, GitHub Actions, and Jenkins;
- Provide fair, unbiased, and detailed assessments of the candidate's technical performance and reasoning, always in professional English;
- Act as a senior professional with over ten years of practical experience in software development, architecture, and engineering;
- Stay up-to-date with the latest technologies, modern frameworks, and best practices in technical interviewing;

- Collaborate with the FloCareer team on the continuous improvement of interview scripts, evaluation criteria, and methodologies;
- Apply solid knowledge of coding, architecture, and design patterns to conduct in-depth technical conversations;
- Demonstrate corporate and technical communication skills in C2 English during interviews and technical reports.

Impact & Selected Achievements

- Conducted more than 100 technical interviews across +30 roles or technology areas, delivering structured assessments in English.
- Contributed to interview framework improvements that reduced inconsistent scoring by at least 30%.

05/2025 – 08/2025

UENI

London WC2A 2JR, London - United Kingdom | Full Time | Remote

Content Analyst (UI/UX)

- Developed corporate websites for businesses with different service offerings and communication needs. Applied UI/UX principles to organize page content, structure navigation, and present business information in a clear and user-oriented format. Developed interfaces for Wix and Wordpress CMS' platform.

- Worked on the design and development of website content, aligning written information and visual elements with each business's corporate identity. Adapted page content and presentation to suit different business contexts and requirements.

- Used HTML, CSS, and JavaScript to support front-end website development and implement design requirements. Worked with these technologies to structure page content, style website elements, and support interactive front-end behavior.

- Created and adapted digital design and branding materials for corporate websites. Considered the relationship between brand presentation, page content, and the overall digital experience when preparing website deliverables.

- Applied marketing principles to website content and digital materials, supporting the presentation of business services and offerings across corporate web pages.

- Conducted research and development to inform website and content work. Explored approaches to design and communication, assessed their suitability for different business needs, and applied creative problem-solving to adapt deliverables.

- Communicated about project requirements and work in written and spoken English, drawing on C2-level proficiency to support professional collaboration.

Impact & Selected Achievements

- Delivered dozens corporate websites, creating and improving mobile usability, accessibility and content clarity against a top-notch corporate SLA standard.
- Created website content and branding assets for ~50 businesses across different industries.

07/2024 – 05/2025

Casa do Ingresso

São Paulo/SP - Brazil | Contractor | Remote

Senior Software Developer

- Developed web and mobile applications for Casa do Ingresso's ticketing platform, which supports operations for Allianz Parque and other commercial partners.

- Built and maintained front-end features using React Native, React, and Next.js.

- Applied Tailwind CSS and Material UI to develop and style user interfaces.

- Worked on back-end services and database functionality using Node.js and Firebase.

- Integrated application authentication and security workflows with Auth0.

- Used GitHub for source control and Vercel for application deployment and delivery workflows.

- Collaborated on application development across the front-end, back-end, database, authentication, and deployment layers.

Impact & Selected Achievements

- Delivered over 50 features and ~17 integration for a ticketing platform serving Allianz Parque and other commercial partners.
- Improved checkout, authentication and page performance, reducing errors, load time, and support requests by 60%.
- Raised page traffic in +200%.

11/2023 – 06/2024

Omnibees

São Paulo/SP - Brazil | Full Time | Presential

Senior Product Designer & Senior UI/UX Designer

- Designed digital experiences for websites and landing pages, from initial interaction concepts through wireframes and prototypes.
- Used Figma to create interface concepts and prototypes, and WordPress to support website development.
- Developed front-end pages and interface elements using JavaScript, React, HTML, CSS, Bootstrap, and Tailwind CSS.
- Created and adapted visual identity materials in line with company branding and marketing requirements.
- Produced digital marketing assets for multiple communication channels, including advertising materials and email marketing.
- Created motion graphics and video content using Adobe After Effects and MotionBro.
- Developed graphic materials using Adobe Photoshop, Illustrator, and Creative Cloud tools.
- Prepared corporate presentations and collaborated with other company areas to coordinate visual and written communications.
- Followed design trends and applied relevant practices to product, website, and marketing work.

Impact & Selected Achievements

- Helped with assessing and developing 1 Junior Graphic Designer to be fully hired and get a promotion.
- Delivered hundreds of projects in web development, landing page, and campaign assets aligned with product and marketing requirements.
- Redesigned the entire Marketing team task system, contributing to a 200% change in team engagement and task completion.
- Established reusable hundreds of components, templates and brand assets adopted across ~10 teams, including the international team.

10/2022 – 04/2023

Google

São Paulo/SP - Brazil | Contractor | Remote

Senior Web Development Instructor

- Delivered web development instruction as part of the seven-month Black Creator Program, a Google initiative developed in Brazil with Creators LLC.
- Taught and mentored a cohort of 100 students selected for the program, supporting their learning across web development and digital experience topics.
- Instructed students in UI/UX methods, introducing approaches to interface design and user experience relevant to building and improving websites.
- Taught content strategy for digital experiences, helping students understand how content structure and presentation contribute to a website's overall experience.
- Covered mobile-first approaches to website performance, including page loading and data consumption considerations for mobile users.
- Explained web development concepts and guided students as they applied the topics covered in instruction to their learning activities.
- Connected web development topics with the program's broader focus on helping creators build their own websites and manage their digital presence.
- Worked directly with program leadership and stakeholders on communication and delivery throughout the engagement.
- Helped address issues affecting program traction and mitigate negative impacts when needed.
- Contributed web development expertise to a program originating at Google in the United States.

Impact & Selected Achievements

- Taught and mentored 100 students in UI/UX, content strategy, mobile-first performance, and data consumption as part of a seven-month program.
- Achieved 80% student completion or satisfaction across the 7-month-period of the project.

12/2021 – 02/2022

CM Capital Markets

São Paulo/SP - Brazil | Contractor | On-Site

Senior Front-End Developer (Angular)

- Developed front-end functionality for web and mobile experiences using Angular and JavaScript. Implemented interface requirements using HTML5, CSS3, and Angular Material.

- Translated software requirements into responsive interfaces, considering how layouts and interface elements should work across web and mobile contexts.

- Created high-fidelity interface prototypes and developed them into working front-end implementations. Used prototyping and interface design tools as part of the design-to-development process.

- Participated in the software development lifecycle, including work on minimum requirements, implementation, validation, and continuous delivery.

- Identified front-end and implementation challenges, analyzed potential solutions, and proposed approaches for addressing technical requirements.

- Supported user testing and used feedback to assess interface behavior and inform front-end work.

- Used GitHub for version control and participated in Agile development practices.

- Applied programming logic and front-end development methods to build and refine application interfaces.

Impact & Selected Achievements

- Delivered ~50 responsive interfaces or features for Debentures product and internal workflows using Angular.
- Improved task completion, mobile usability and page performance by 35% through interface updates and user testing.

12/2008 – 11/2021

BALBOAiD

Campinas/SP - Brazil | Self-Employed | Hybrid

Tech Lead, UI/UX & Web Developer

Delivered work for clients including Google, Shell, Red Bull, Ambev, Corona Extra, Tegra Incorporadora, Iveco, XP Investimentos, GreenYellow, and Sumitomo.

- Led technology, design, and digital delivery for a marketing and technology agency, overseeing work across web development, UI/UX, branding, digital marketing, and creative production.

- Managed client engagements from initial discussions and requirements analysis through solution planning, design, development, and delivery. Supported client prospecting, ongoing customer service, and agency administration.

- Directed front-end development using JavaScript, React, Angular, CSS, Bootstrap, and Tailwind CSS. Developed websites and digital interfaces to address client and project requirements.

- Led back-end development work using JavaScript, Node.js, C#, PHP, and Python. Worked across application layers to deliver web solutions and custom software.

- Designed UI/UX and digital product experiences using Figma, Sketch, and Adobe XD. Developed interface concepts and design materials to support website and application work.

- Built and maintained content-managed websites with WordPress. Delivered low-code development work using OutSystems and Bubble when appropriate to project needs.

- Worked with SQL and NoSQL databases, including MariaDB, as part of application and website development.

- Planned and coordinated projects using Jira and Trello, applying Scrum and Kanban practices to organize work and track delivery. Used Google Calendar and MindMeister to support scheduling, workflow planning, and mind mapping.

- Worked with cloud platforms and services, including Microsoft Azure and Amazon Web Services (AWS), in support of client technology projects.

- Led employees and project teams, coordinating responsibilities and supporting the development of technical and professional skills across a broad range of work.

- Communicated directly with clients in English, providing customer service to clients in international markets. The agency served clients across Latin America, the United States, Australia, and Portugal.

- Supported business administration and financial operations alongside technology and creative delivery, taking responsibility for a broad range of agency activities.

- Directed and created visual materials for digital marketing and brand communication using Adobe Photoshop, Illustrator, and Fireworks.

- Produced motion graphics and video content using Adobe After Effects and MotionBro.
- Developed 3D content and visual assets using Cinema 4D, Maya, and Google SketchUp.

Impact & Selected Achievements

- Led delivery of ~2K digital projects for clients including international clients across web development, UI/UX, branding, and digital marketing.
- Helped companies achieve more than 1000% ROI multiple times.
- Managed a team of 25+ and coordinated 20+ concurrent projects, delivering on schedule.
- Served 500+ clients across multiple different markets during 13 years.

08/2007 – 11/2008

MKTPRO | Markteam Pro Events

São Paulo/SP - Brazil | Full Time | On-Site

UI/UX Designer & Graphic Designer

- Created visual communication materials for corporate events, promotional campaigns, and sponsorship initiatives.
- Developed graphic assets for print and digital formats, ensuring visual consistency across event communication, marketing collateral, and online materials.
- Maintained and updated the company's main website, supporting its visual presentation and ongoing content needs.
- Designed event microsites and landing pages to present event information, artists, sponsors, and campaign materials in a clear and engaging format.
- Prepared sponsorship proposals and presentation materials, combining visual design, event information, and commercial messaging for prospective partners.
- Produced creative assets for events featuring internationally recognized artists, including Tiësto, Carl Cox, Paul van Dyk, and Swen Weber.
- Worked with marketing, production, and commercial teams to adapt design deliverables to campaign timelines, event requirements, and sponsor needs.
- Supported the full creative workflow, from concept development and layout design through production-ready assets and final delivery.

07/2006 – 07/2007

Cidade do Cérebro

Campinas/SP - Brazil | Full Time | On-Site

Jr Web Designer

- Supported the company's web department by designing, updating, and maintaining website pages and digital content.
- Created visual layouts and web assets aligned with the company's communication and training-related initiatives.
- Assisted with website maintenance, including content updates, page organization, visual improvements, and basic front-end adjustments.
- Prepared digital materials to support the company's online presence and communication with clients and partners.
- Translated selected materials between English and Portuguese, supporting communication related to Tony Robbins training DVD content.
- Helped bridge communication between the company and English-speaking partners by adapting written content accurately for both audiences.
- Worked across web design, content organization, visual communication, and bilingual support in a fast-paced digital environment.

02/2006 – 06/2006

1Web Comunicações

Campinas/SP - Brazil | Full Time | On-Site

Jr Web Designer

- Supported the design and development of websites and digital communication materials for client projects.
- Created page layouts, web graphics, banners, and visual assets based on client requirements and campaign objectives.
- Assisted with HTML and CSS implementation to structure and style website pages.
- Updated website content and supported routine maintenance tasks across client digital properties.
- Worked with design and communication teams to adapt visual materials for web-based campaigns and corporate websites.
- Helped translate creative concepts into functional digital layouts, considering usability, visual hierarchy, and consistency.
- Participated in the delivery of web design work from initial layout preparation through final implementation and publishing support.

01/2005 – 02/2006

Portal Publicidade

Campinas/SP - Brazil | Full Time | On-Site

Intern

- Supported the creative and digital communication team in the development of advertising and promotional materials.
- Assisted with the preparation of graphic assets for client campaigns, presentations, and communication pieces.
- Contributed to the creation and organization of visual references, layouts, and design materials used during campaign development.
- Helped adapt artwork for different communication formats, including print and digital applications.
- Supported routine creative production activities, working with designers and account teams to meet project requirements and delivery deadlines.
- Gained practical experience in advertising workflows, visual communication, branding, and client-focused creative delivery.
